JOURNAL OF GUIDANCE, CONTROL, AND DYNAMICS
Vol. 29, No. 6, November–December 2006

2006 *Journal of Guidance, Control, and Dynamics* Index

How to Use the Index

In the Subject Index, pages 1487–1492, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, pages 1493–1494, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1495–1500, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2006, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Aerodynamics

G06-072 Dynamic Shape Control of a Morphing Airfoil Using Spatially Distributed Transducers

Aeroelasticity and Aeroservoelasticity

G06-023 Adaptive Decoupled Fuzzy Sliding-Mode Control of a Nonlinear Aeroelastic System
G06-087 Adaptive Control for a Nonlinear Wing Section with Multiple Flaps
G06-017 Closed-Loop Aeromechanical Stability of Hingeless Rotor Helicopters with Higher Harmonic Control
G06-021 Aeroelastic Response of Flapped-Wing Systems Using Robust Estimation Control Methodology
G06-162 Aeroservoelastic Stability of Supersonic Slender Body Flight Vehicles
G06-044 Nonlinear Adaptive Control of an Aeroelastic Two-Dimensional Lifting Surface

Air Transportation

G06-001 Computer-Aided Eulerian Air Traffic Flow Modeling and Predictive Control
G06-159 Performance Optimization for a Towed Cable System with Attached Wind Sock

Collision Avoidance

G06-018 Energy Suboptimal Collision-Free Path Reconfiguration for Spacecraft Formation Flying
G06-069 Satellite Collision Probability Enhancements
G06-004 Tractable Conflict Risk Accumulation in Quadratic Space for Autonomous Vehicles

Communication and Air Traffic Control

G06-001 Computer-Aided Eulerian Air Traffic Flow Modeling and Predictive Control
G06-115 Aggregate Flow Model for Air-Traffic Management

Flight Mechanics

G06-051 Design of a Gain-Scheduled Flight Control System Using Bifurcation Analysis

Landing Dynamics

G06-138 Investigation of the Flare Maneuver Using Optical Tau

Man/Machine Interface

G06-140 Certification and Design Issues for Rudder Control Systems in Transport Aircraft
G06-067 Comparison of Control and Display Augmentation for Perspective Flight-Path Displays
G06-093 Path-Oriented Control/Display Augmentation for Perspective Flight-Path Displays

Micro Air Vehicles

G06-072 Dynamic Shape Control of a Morphing Airfoil Using Spatially Distributed Transducers
G06-137 Nonlinear Model Predictive Control Technique for Unmanned Air Vehicles

Military Missions

G06-034 Optimal Path Planning for Unmanned Combat Aerial Vehicles to Defeat Radar Tracking

Rotorcraft

G06-047 Adaptive Model Inversion Control of a Helicopter with Structural Load Limiting
G06-139 Effect of Piezoelectric Hysteresis on Helicopter Vibration Control Using Trailing-Edge Flaps
G06-017 Closed-Loop Aeromechanical Stability of Hingeless Rotor Helicopters with Higher Harmonic Control
G06-152 Simplified Technique for Modeling Piloted Rotorcraft Operations Near Ships

Uninhabited and Unmanned Air Vehicles

G06-100 Trajectory Tracking Controller for Vision-Based Probe and Drogue Autonomous Aerial Refueling
G06-072 Dynamic Shape Control of a Morphing Airfoil Using Spatially Distributed Transducers
G06-050 Full-Envelope Robust Control of a Shrouded-Fan Unmanned Vehicle
G06-004 Tractable Conflict Risk Accumulation in Quadratic Space for Autonomous Vehicles

Vibration

G06-139 Effect of Piezoelectric Hysteresis on Helicopter Vibration Control Using Trailing-Edge Flaps
G06-099 Dynamic Testing of an Inflatable, Self-Supporting, Unpressurized Thin-Film Torus

COMPUTING, INFORMATION, AND COMMUNICATION

Artificial Intelligence Systems

G06-029 Intent Inference with Path Prediction
G06-036 Linear Programming and Language Processing for Human-Unmanned Aerial-Vehicle Team Missions

ATC Systems

G06-029 Intent Inference with Path Prediction

Autonomous Systems

G06-082 Precision Free-Inertial Navigation with Gravity Compensation by an Onboard Gradiometer
G06-123 International Space Station Leak Localization Using Attitude Response Data
G06-035 Nonlinear Trajectory Generation for Autonomous Vehicles via Parametrized Maneuver Classes
G06-004 Tractable Conflict Risk Accumulation in Quadratic Space for Autonomous Vehicles

Distributed Systems and Networking

G06-089 Algorithms for Geolocation of an Ad Hoc Network of Unmanned Systems

ENERGY

Flywheels

G06-027 Robust Reorientation and Power Controller Using Flywheels and Control Moment Gyroscopes

Fuel Economy

G06-071 Closed-Form Specified-Fuel Commands for On-Off Thrusters

FLIGHT SIMULATOR SYSTEMS

Guidance, Navigation, and Control Systems

G06-119 Multistepping Approach to Finite-Interval Missile Integrated Control
G06-077 Feasible Flight Paths for Cooperative Generation of a Phantom Radar Track
G06-008 Endgame Guidance and Relative Navigation of Strategic Interceptors with Delays
G06-060 Concerning Lyapunov-Based Guidance

G06-013 Decentralized Control of Satellite Clusters Under Limited Communication
G06-172 Flight Test of Model-Matching Controller for In-Flight Simulator MuPAL-alpha

Laser Communications

G06-143 Laser Pointing and Tracking Using a Completely Electromagnetically Suspended Precision Actuator

FLUID DYNAMICS

Unsteady Flows

G06-087 Adaptive Control for a Nonlinear Wing Section with Multiple Flaps

GUIDANCE, CONTROL, AND DYNAMICS TECHNOLOGY

Aircraft Dynamics

G06-068 Free-Wing Unmanned Aerial Vehicle as a Microgravity Facility
G06-010 Optimal Fighter Pursuit-Evasion Maneuvers Found Via Two-Sided Optimization
G06-141 Peak-Seeking Control for Drag Reduction in Formation Flight
G06-043 Nonlinear Aeroelastic System Identification with Application to Experimental Data

Aircraft Guidance

G06-138 Investigation of the Flare Maneuver Using Optical Tau
G06-153 Affine Parameter-Dependent Preview Control for Rotorcraft Terrain Following Flight
G06-127 Modeling Air Combat by a Moving Horizon Influence Diagram Game
G06-030 A Unified Architecture For Strapdown Integration Algorithms
G06-122 Optimization and Implementation of Periodic Cruise for a Hypersonic Vehicle
G06-093 Path-Oriented Control/Display Augmentation for Perspective Flight-Path Displays
G06-100 Trajectory Tracking Controller for Vision-Based Probe and Drogue Autonomous Aerial Refueling
G06-128 Unmanned Aerial Vehicle Path Following for Target Observation in Wind
G06-060 Concerning Lyapunov-Based Guidance

Aircraft Stability and Control

G06-020 Computation of Worst-Case Pilot Inputs for Nonlinear Flight Control System Analysis
G06-105 Airship Hover Stabilization Using a Backstepping Control Approach
G06-152 Simplified Technique for Modeling Piloted Rotorcraft Operations Near Ships
G06-172 Flight Test of Model-Matching Controller for In-Flight Simulator MuPAL-alpha
G06-163 Estimation of the Region of Attraction for State-Dependent Riccati Equation Controllers
G06-102 Flight Control Law Design for a Flexible Aircraft: Limits of Performance
G06-106 Necessary and Sufficient Conditions for H-Infinity Static Output-Feedback Control
G06-054 Design of Autoland Controller Functions with Multiobjective Optimization
G06-049 Combined Feedback Linearization and Constrained Model Predictive Control for Entry Flight
G06-140 Certification and Design Issues for Rudder Control Systems in Transport Aircraft
G06-147 Tailored Dynamic Gain-Scheduled Control
G06-051 Design of a Gain-Scheduled Flight Control System Using Bifurcation Analysis
G06-050 Full-Envelope Robust Control of a Shrouded-Fan Unmanned Vehicle
G06-052 Direct Adaptive Neural Flight Controller for F-8 Fighter Aircraft

Artificial Intelligence

G06-052 Direct Adaptive Neural Flight Controller for F-8 Fighter Aircraft

Astrodynamics

G06-040 Robust Capture and Transfer Trajectories for Planetary Satellite Orbiters
G06-012 Spacecraft Formation Dynamics and Design
G06-007 Nonlinear Recursive Estimation of Boost Trajectories, Including Batch Initialization and Burnout Estimation
G06-098 Linear Dynamics and Stability Analysis of a Two-Craft Coulomb Tether Formation
G06-042 Application of the Cayley Form to General Spacecraft Motion
G06-135 Absolute and Relative Orbit Analysis for Resonant Satellite Motion.
G06-064 Solar Sail Equilibria in the Elliptical Restricted Three-Body Problem
G06-132 Periodic Orbits with Low-Thrust Propulsion in the Restricted Three-body Problem
G06-164 Equilibrium Configurations of a Four-Body Tethered System
G06-157 Models for Rhumb-Line Attitude Maneuvers and Error Propagation Effects
G06-142 Orbit Design for Ground Surveillance Using Genetic Algorithms
G06-011 Phase Space Structure Around Oblate Planetary Satellites
G06-144 Minimagnetospheric Plasma Propulsion for Outer Planet Missions
G06-022 Optimal Servicing of Geosynchronous Satellites
G06-065 Parking a Spacecraft near an Asteroid Pair
G06-057 Precise Lunar Gravity Assist Transfers to Geostationary Orbits
G06-058 Evaluating Accessibility of near-Earth Asteroids Via Earth Gravity Assists
G06-025 Statistical Distribution of Keplerian Velocities
G06-156 On the Lyapunov Stability of Stationary Points Around a Central Body
G06-133 Collision Avoidance for Satellites in Formation Flight
G06-095 Spin Axis Attitude Determination Accuracy Model in Presence of Biases
G06-165 Ant Colony Algorithms for Two Impluse Interplanetary Trajectory Optimization
G06-170 Collision Probability for Larger Bodies Having Nonlinear Relative Motion
G06-116 Trajectories to and from the Lagrange Points and the Primary Body Surfaces
G06-134 Design of Science Orbits About Planetary Satellites: Application to Europa
G06-016 Trajectory Estimation for Satellite Clusters
G06-096 In-Plane Payload Capture . with an Elastic Tether

Autonomous Vehicles

G06-105 Airship Hover Stabilization Using a Backstepping Control Approach
G06-080 Software-Enabled Receding Horizon Control for Autonomous Unmanned Aerial Vehicle Guidance
G06-086 Earth-Pointing Recovery
G06-100 Trajectory Tracking Controller for Vision-Based Probe and Drogue Autonomous Aerial Refueling
G06-092 Modeling, Control, and Flight Testing of a Small-Ducted Fan Aircraft
G06-083 Adaptive Formation Control for Rovers Traveling over Unknown Terrains
G06-084 Adaptive Guidance and Control for Autonomous Hypersonic Vehicles
G06-035 Nonlinear Trajectory Generation for Autonomous Vehicles via Parametrized Maneuver Classes
G06-122 Optimization and Implementation of Periodic Cruise for a Hypersonic Vehicle
G06-033 Adaptive Terminal Guidance for Hypervelocity Impact in Specified Direction
G06-005 Spacecraft Navigation Using X-Ray Pulsars

Avionics Systems

G06-030 A Unified Architecture For Strapdown Integration Algorithms

Control System Design

G06-113 Decision-Directed Adaptive Estimation and Guidance for an Interception Endgame
G06-137 Nonlinear Model Predictive Control Technique for Unmanned Air Vehicles
G06-111 Computationally Inexpensive Guidance Algorithm for Fuel-Efficient Terminal Descent
G06-002 Feedback Control of Plants Driven by Nonlinear Actuators via Input-State Linearization
G06-071 Closed-Form Specified-Fuel Commands for On-Off Thrusters
G06-049 Combined Feedback Linearization and Constrained Model Predictive Control for Entry Flight
G06-083 Adaptive Formation Control for Rovers Traveling over Unknown Terrains
G06-023 Adaptive Decoupled Fuzzy Sliding-Mode Control of a Nonlinear Aeroelastic System
G06-093 Path-Oriented Control/Display Augmentation for Perspective Flight-Path Displays
G06-054 Design of Autoland Controller Functions with Multiobjective Optimization
G06-003 Control and Maneuverability of a Square Cross-Section Missile
G06-106 Necessary and Sufficient Conditions for H-Infinity Static Output-Feedback Control
G06-075 Fault-Tolerant Structured Adaptive Model Inversion Control
G06-167 Equilibrium Control of Electrodynamic Tethered Satellite Systems in Inclined Orbits
G06-098 Linear Dynamics and Stability Analysis of a Two-Craft Coulomb Tether Formation
G06-050 Full-Envelope Robust Control of a Shrouded-Fan Unmanned Vehicle
G06-051 Design of a Gain-Scheduled Flight Control System Using Bifurcation Analysis
G06-055 Design and Flight Testing of an H00 Controller for a Robotic Helicopter
G06-067 Comparison of Control and Display Augmentation for Perspective Flight-Path Displays

G06-019 Dynamic Modeling and Neural-Network Adaptive Control of a Deployable Manipulator System
G06-119 Multistepping Approach to Finite-Interval Missile Integrated Control
G06-153 Affine Parameter-Dependent Preview Control for Rotorcraft Terrain Following Flight
G06-148 Quasilinear Parameter-Varying Autopilot Design Using Polynomial Eigenstructure Assignment with Actuator Constraints
G06-108 Real-Time Dynamic Optimization of Controllable Linear Systems
G06-143 Laser Pointing and Tracking Using a Completely Electromagnetically Suspended Precision Actuator
G06-124 Fault-Detection Design for Uninhabited Aerial Vehicles
G06-160 Simple Practical Classical-H2 Optimal Robust Controller
G06-079 Restructurable Guidance and Control for Aircraft with Failures Considering Gust Effects
G06-097 Switching Control for Guaranteeing the Safety of a Tethered Satellite
G06-105 Airship Hover Stabilization Using a Backstepping Control Approach
G06-163 Estimation of the Region of Attraction for State-Dependent Riccati Equation Controllers

Control System Sensors

G06-112 Stability Analysis of a Dynamically Tuned Gyroscope

Control Theory

G06-079 Restructurable Guidance and Control for Aircraft with Failures Considering Gust Effects
G06-121 Spacecraft Attitude Control Using Approximate Receding-Horizon Model-Error Control Synthesis
G06-160 Simple Practical Classical-H2 Optimal Robust Controller
G06-163 Estimation of the Region of Attraction for State-Dependent Riccati Equation Controllers
G06-172 Flight Test of Model-Matching Controller for In-Flight Simulator MuPAL-alpha
G06-171 Asymptotic Stability of Second-Order Linear Time-Varying Systems
G06-147 Tailored Dynamic Gain-Scheduled Control
G06-158 Optimal Balanced-Energy Formation Flying Maneuvers
G06-148 Quasilinear Parameter-Varying Autopilot Design Using Polynomial Eigenstructure Assignment with Actuator Constraints
G06-019 Dynamic Modeling and Neural-Network Adaptive Control of a Deployable Manipulator System
G06-136 Parametric Model and Optimal Control of Solar Sails with Optical Degradation
G06-074 Predictive Optimal Control of a Hyperbolic Distributed Model for a Wind Tunnel
G06-161 Solving Linear and Quadratic Quaternion Equations
G06-044 Nonlinear Adaptive Control of an Aeroelastic Two-Dimensional Lifting Surface
G06-075 Fault-Tolerant Structured Adaptive Model Inversion Control
G06-106 Necessary and Sufficient Conditions for H-Infinity Static Output-Feedback Control
G06-102 Flight Control Law Design for a Flexible Aircraft: Limits of Performance
G06-023 Adaptive Decoupled Fuzzy Sliding-Mode Control of a Nonlinear Aeroelastic System
G06-083 Adaptive Formation Control for Rovers Traveling over Unknown Terrains
G06-049 Combined Feedback Linearization and Constrained Model Predictive Control for Entry Flight
G06-002 Feedback Control of Plants Driven by Nonlinear Actuators via Input-State Linearization
G06-045 Tensor Product Model-Based Control of Two-Dimensional Aeroelastic System
G06-150 Linear Feedback Control Using Quasi Velocities
G06-149 Spacecraft Line-of-Sight Control Using a Single Variable-Speed Control Moment Gyro
G06-141 Peak-Seeking Control for Drag Reduction in Formation Flight
G06-104 Adaptive Output Feedback Control for Spacecraft Rendezvous and Docking Under Measurement Uncertainty
G06-085 Stochastic Stability Analysis of Predictive Filters

Differential Games

G06-127 Modeling Air Combat by a Moving Horizon Influence Diagram Game
G06-125 Game Optimal Support Time of a Medium Range Air-to-Air Missile
G06-010 Optimal Fighter Pursuit-Evasion Maneuvers Found Via Two-Sided Optimization

Dynamics

G06-059 Numerical Continuation of Torque--Free Motions of Gyrostats
G06-109 Aeroelastic System Identification Using the Minimum Model Error Method
G06-012 Spacecraft Formation Dynamics and Design
G06-167 Equilibrium Control of Electrodynamic Tethered Satellite Systems in Inclined Orbits
G06-042 Application of the Cayley Form to General Spacecraft Motion
G06-098 Linear Dynamics and Stability Analysis of a Two-Craft Coulomb Tether Formation
G06-038 Solving Optimal Continuous Thrust Rendezvous Problems with Generating Functions
G06-171 Asymptotic Stability of Second-Order Linear Time-Varying Systems
G06-156 On the Lyapunov Stability of Stationary Points Around a Central Body

Flight Displays

G06-067 Comparison of Control and Display Augmentation for Perspective Flight-Path Displays
G06-138 Investigation of the Flare Maneuver Using Optical Tau

Flight Mechanics

G06-132 Periodic Orbits with Low-Thrust Propulsion in the Restricted Three-body Problem
G06-064 Solar Sail Equilibria in the Elliptical Restricted Three-Body Problem
G06-032 Generalized Vector Explicit Guidance
G06-078 Asymptotic Analysis of Quasi-Equilibrium Glide in Lifting Entry Flight
G06-061 Closed-Form Solutions for Near-Circular Arcs with Quadratic Drag
G06-057 Precise Lunar Gravity Assist Transfers to Geostationary Orbits
G06-068 Free-Wing Unmanned Aerial Vehicle as a Microgravity Facility

Handling Qualities

G06-047 Adaptive Model Inversion Control of a Helicopter with Structural Load Limiting
G06-140 Certification and Design Issues for Rudder Control Systems in Transport Aircraft
G06-152 Simplified Technique for Modeling Piloted Rotorcraft Operations Near Ships

Information Processing

G06-081 Null-Space Square-Root Information Filtering and Smoothing for Singular Problems

Intelligent Control

G06-052 Direct Adaptive Neural Flight Controller for F-8 Fighter Aircraft
G06-092 Modeling, Control, and Flight Testing of a Small-Ducted Fan Aircraft
G06-137 Nonlinear Model Predictive Control Technique for Unmanned Air Vehicles

Launch Vehicle Dynamics

G06-007 Nonlinear Recursive Estimation of Boost Trajectories, Including Batch Initialization and Burnout Estimation
G06-088 Optimal Design of Octo-Strut Vibration Isolation Platform

Launch Vehicle Guidance and Control

G06-168 Guidance Law for an Air-Breathing Launch Vehicle Using Predictive Control Concept
G06-084 Adaptive Guidance and Control for Autonomous Hypersonic Vehicles

Missile Dynamics

G06-003 Control and Maneuverability of a Square Cross-Section Missile
G06-032 Generalized Vector Explicit Guidance
G06-162 Aeroservoelastic Stability of Supersonic Slender Body Flight Vehicles

Missile Guidance and Control

G06-073 Missile Controlled by Lift and Divert Thrusters Using Nonlinear Dynamic Sliding Manifolds
G06-032 Generalized Vector Explicit Guidance
G06-033 Adaptive Terminal Guidance for Hypervelocity Impact in Specified Direction
G06-031 Sliding-Mode Control for Integrated Missile Autopilot Guidance
G06-119 Multistepping Approach to Finite-Interval Missile Integrated Control
G06-148 Quasilinear Parameter-Varying Autopilot Design Using Polynomial Eigenstructure Assignment with Actuator Constraints
G06-008 Endgame Guidance and Relative Navigation of Strategic Interceptors with Delays
G06-003 Control and Maneuverability of a Square Cross-Section Missile
G06-037 Circular-Navigation-Guidance Law for Precision Missile/Target Engagements
G06-113 Decision-Directed Adaptive Estimation and Guidance for an Interception Endgame
G06-060 Concerning Lyapunov-Based Guidance

Navigation

G06-082 Precision Free-Inertial Navigation with Gravity Compensation by an Onboard Gradiometer

G06-101 Visual Positioning System for an Underwater Space Simulation Environment
G06-114 New Global Navigation Satellite System Ambiguity Resolution Method Compared to Existing Approaches
G06-037 Circular-Navigation-Guidance Law for Precision Missile/Target Engagements
G06-030 A Unified Architecture For Strapdown Integration Algorithms
G06-056 Robust Rendezvous Navigation in Elliptical Orbit
G06-008 Endgame Guidance and Relative Navigation of Strategic Interceptors with Delays
G06-061 Closed-Form Solutions for Near-Circular Arcs with Quadratic Drag
G06-090 Integral Evaluations Enabling Performance Tradeoffs for Two-Confidence-Region-Based Failure Detection
G06-005 Spacecraft Navigation Using X-Ray Pulsars
G06-009 Robust Navigation Using the Global Positioning System in the Presence of Spoofing
G06-155 Nonlinear Mapping of Gaussian Statistics: Theory and Applications to Spacecraft Trajectory Design

Optimization Techniques

G06-158 Optimal Balanced-Energy Formation Flying Maneuvers
G06-108 Real-Time Dynamic Optimization of Controllable Linear Systems
G06-154 Indirect Optimization of Spiral Trajectories
G06-046 Optimal Control of an Aircraft-Towed Flexible Cable System
G06-055 Design and Flight Testing of an H00 Controller for a Robotic Helicopter
G06-107 Optimal Finite-Time Feedback Controllers for Nonlinear Systems with Terminal Constraints
G06-024 Optimal Missions with Mini-Magnetospheric Plasma Propulsion
G06-054 Design of Autoland Controller Functions with Multiobjective Optimization
G06-010 Optimal Fighter Pursuit-Evasion Maneuvers Found Via Two-Sided Optimization
G06-076 Improved Indirect Method for Air-Vehicle Trajectory Optimization
G06-111 Computationally Inexpensive Guidance Algorithm for Fuel-Efficient Terminal Descent
G06-159 Performance Optimization for a Towed Cable System with Attached Wind Sock
G06-041 Optimization of a Broad Class of Ephemeris Model Earth-Mars Cyclers
G06-080 Software-Enabled Receding Horizon Control for Autonomous Unmanned Aerial Vehicle Guidance
G06-088 Optimal Design of Octo-Strut Vibration Isolation Platform
G06-020 Computation of Worst-Case Pilot Inputs for Nonlinear Flight Control System Analysis
G06-145 Lambert's Problem for Exponential Sinusoids
G06-160 Simple Practical Classical-H2 Optimal Robust Controller
G06-121 Spacecraft Attitude Control Using Approximate Receding-Horizon Model-Error Control Synthesis
G06-165 Ant Colony Algorithms for Two Impluse Interplanetary Trajectory Optimization

Pointing Systems

G06-128 Unmanned Aerial Vehicle Path Following for Target Observation in Wind
G06-143 Laser Pointing and Tracking Using a Completely Electromagnetically Suspended Precision Actuator

Redundancy Management

G06-090 Integral Evaluations Enabling Performance Tradeoffs for Two-Confidence-Region-Based Failure Detection
G06-070 Health Monitoring of a Satellite System

Robotics

G06-019 Dynamic Modeling and Neural-Network Adaptive Control of a Deployable Manipulator System
G06-101 Visual Positioning System for an Underwater Space Simulation Environment

Signal Processing

G06-082 Precision Free-Inertial Navigation with Gravity Compensation by an Onboard Gradiometer
G06-124 Fault-Detection Design for Uninhabited Aerial Vehicles
G06-081 Null-Space Square-Root Information Filtering and Smoothing for Singular Problems
G06-053 Novel Adaptive Generalized Likelihood Ratio Detector with Application to Maneuvering Target Tracking

Spacecraft Dynamics

G06-042 Application of the Cayley Form to General Spacecraft Motion
G06-117 Manifolds and Metrics in the Relative Spacecraft Motion Problem
G06-061 Closed-Form Solutions for Near-Circular Arcs with Quadratic Drag
G06-039 Evolutionary Search for Deep-Space Science Mission Orbits
G06-167 Equilibrium Control of Electrodynamic Tethered Satellite Systems in Inclined Orbits
G06-014 Formation Design in Eccentric Orbits Using Linearized Equations of Relative Motion
G06-064 Solar Sail Equilibria in the Elliptical Restricted Three-Body Problem
G06-157 Models for Rhumb-Line Attitude Maneuvers and Error Propagation Effects
G06-149 Spacecraft Line-of-Sight Control Using a Single Variable-Speed Control Moment Gyro
G06-002 Feedback Control of Plants Driven by Nonlinear Actuators via Input-State Linearization
G06-015 Optimal Planner for Spacecraft Formations in Elliptical Orbits
G06-063 Dynamics and Control of Displaced Periodic Orbits Using Solar-Sail Propulsion
G06-028 Energy Rate Feedback for Libration Control of Electrodynamic Tethers
G06-026 General Formula for Extracting the Euler Angles
G06-059 Numerical Continuation of Torque--Free Motions of Gyrostats
G06-099 Dynamic Testing of an Inflatable, Self-Supporting, Unpressurized Thin-Film Torus
G06-145 Lambert's Problem for Exponential Sinusoids
G06-116 Trajectories to and from the Lagrange Points and the Primary Body Surfaces
G06-062 Optimal Relocation of Satellites Flying in Near-Circular-Orbit Formations
G06-025 Statistical Distribution of Keplerian Velocities
G06-169 Optimal Control Laws for Momentum-Wheel Desaturation Using Magnetorquers
G06-130 Periodic Relative Motion Near a Keplerian Elliptic Orbit with Nonlinear Differential Gravity

Spacecraft Guidance and Control

G06-097 Switching Control for Guaranteeing the Safety of a Tethered Satellite
G06-094 Investigation of Periodic-Disturbance Identification and Rejection in Spacecraft
G06-013 Decentralized Control of Satellite Clusters Under Limited Communication
G06-027 Robust Reorientation and Power Controller Using Flywheels and Control Moment Gyroscopes
G06-086 Earth-Pointing Recovery
G06-112 Stability Analysis of a Dynamically Tuned Gyroscope
G06-121 Spacecraft Attitude Control Using Approximate Receding-Horizon Model-Error Control Synthesis
G06-123 International Space Station Leak Localization Using Attitude Response Data
G06-129 Decentralized Coordinated Attitude Control Within a Formation of Spacecraft
G06-056 Robust Rendezvous Navigation in Elliptical Orbit
G06-006 Fast Star-Pattern Recognition Using Planar Triangles
G06-133 Collision Avoidance for Satellites in Formation Flight
G06-026 General Formula for Extracting the Euler Angles
G06-028 Energy Rate Feedback for Libration Control of Electrodynamic Tethers
G06-018 Energy Suboptimal Collision-Free Path Reconfiguration for Spacecraft Formation Flying
G06-063 Dynamics and Control of Displaced Periodic Orbits Using Solar-Sail Propulsion
G06-022 Optimal Servicing of Geosynchronous Satellites
G06-066 Proximity Operations of Formation-Flying Spacecraft Using an Eccentricity/Inclination Vector Separation
G06-015 Optimal Planner for Spacecraft Formations in Elliptical Orbits
G06-071 Closed-Form Specified-Fuel Commands for On-Off Thrusters
G06-149 Spacecraft Line-of-Sight Control Using a Single Variable-Speed Control Moment Gyro
G06-111 Computationally Inexpensive Guidance Algorithm for Fuel-Efficient Terminal Descent
G06-103 Attitude Estimation from Vector Observations Using a Genetic-Algorithm-Embedded Quaternion Particle Filter
G06-104 Adaptive Output Feedback Control for Spacecraft Rendezvous and Docking Under Measurement Uncertainty
G06-157 Models for Rhumb-Line Attitude Maneuvers and Error Propagation Effects
G06-155 Nonlinear Mapping of Gaussian Statistics: Theory and Applications to Spacecraft Trajectory Design
G06-158 Optimal Balanced-Energy Formation Flying Maneuvers
G06-146 Genesis of Three-Axis Spacecraft Guidance, Control, and On-Orbit Stabilization

G06-120 Improvement to the Analytical Predictor-Corrector Guidance Algorithm Applied to Mars Aerocapture
G06-033 Adaptive Terminal Guidance for Hypervelocity Impact in Specified Direction
G06-038 Solving Optimal Continuous Thrust Rendezvous Problems with Generating Functions

State Estimation

G06-155 Nonlinear Mapping of Gaussian Statistics: Theory and Applications to Spacecraft Trajectory Design
G06-089 Algorithms for Geolocation of an Ad Hoc Network of Unmanned Systems
G06-007 Nonlinear Recursive Estimation of Boost Trajectories, Including Batch Initialization and Burnout Estimation
G06-009 Robust Navigation Using the Global Positioning System in the Presence of Spoofing
G06-081 Null-Space Square-Root Information Filtering and Smoothing for Singular Problems
G06-053 Novel Adaptive Generalized Likelihood Ratio Detector with Application to Maneuvering Target Tracking
G06-110 Unmanned Aerial Vehicle Dynamic-Target Pursuit by Using Probabilistic Threat Exposure Map
G06-113 Decision-Directed Adaptive Estimation and Guidance for an Interception Endgame
G06-126 Batch Algorithm for Global-Positioning-System Attitude Determination and Integer Ambiguity Resolution
G06-103 Attitude Estimation from Vector Observations Using a Genetic-Algorithm-Embedded Quaternion Particle Filter
G06-056 Robust Rendezvous Navigation in Elliptical Orbit
G06-085 Stochastic Stability Analysis of Predictive Filters
G06-101 Visual Positioning System for an Underwater Space Simulation Environment

Structural Control

G06-102 Flight Control Law Design for a Flexible Aircraft: Limits of Performance
G06-166 Deadbeat Predictive Control on a Space Truss Structure
G06-021 Aeroelastic Response of Flapped-Wing Systems Using Robust Estimation Control Methodology

System Identification

G06-048 System Identification of a Nonlinear Mode for the Shuttle Radar Topography Mission
G06-115 Aggregate Flow Model for Air-Traffic Management
G06-053 Novel Adaptive Generalized Likelihood Ratio Detector with Application to Maneuvering Target Tracking
G06-109 Aeroelastic System Identification Using the Minimum Model Error Method
G06-043 Nonlinear Aeroelastic System Identification with Application to Experimental Data
G06-029 Intent Inference with Path Prediction
G06-079 Restructurable Guidance and Control for Aircraft with Failures Considering Gust Effects

Trajectory Optimization

G06-096 In-Plane Payload Capture with an Elastic Tether
G06-062 Optimal Relocation of Satellites Flying in Near-Circular-Orbit Formations
G06-046 Optimal Control of an Aircraft-Towed Flexible Cable System
G06-038 Solving Optimal Continuous Thrust Rendezvous Problems with Generating Functions
G06-118 Indirect Optimization of Low-Thrust Capture Trajectories
G06-142 Orbit Design for Ground Surveillance Using Genetic Algorithms
G06-154 Indirect Optimization of Spiral Trajectories
G06-034 Optimal Path Planning for Unmanned Combat Aerial Vehicles to Defeat Radar Tracking
G06-110 Unmanned Aerial Vehicle Dynamic-Target Pursuit by Using Probabilistic Threat Exposure Map
G06-107 Optimal Finite-Time Feedback Controllers for Nonlinear Systems with Terminal Constraints
G06-018 Energy Suboptimal Collision-Free Path Reconfiguration for Spacecraft Formation Flying
G06-057 Precise Lunar Gravity Assist Transfers to Geostationary Orbits
G06-036 Linear Programming and Language Processing for Human-Unmanned Aerial-Vehicle Team Missions
G06-035 Nonlinear Trajectory Generation for Autonomous Vehicles via Parametrized Maneuver Classes
G06-041 Optimization of a Broad Class of Ephemeris Model Earth-Mars Cyclers
G06-122 Optimization and Implementation of Periodic Cruise for a Hypersonic Vehicle
G06-125 Game Optimal Support Time of a Medium Range Air-to-Air Missile
G06-076 Improved Indirect Method for Air-Vehicle Trajectory Optimization
G06-084 Adaptive Guidance and Control for Autonomous Hypersonic Vehicles

UAVs

G06-076 Improved Indirect Method for Air-Vehicle Trajectory Optimization
G06-036 Linear Programming and Language Processing for Human-Unmanned Aerial-Vehicle Team Missions
G06-092 Modeling, Control, and Flight Testing of a Small-Ducted Fan Aircraft
G06-068 Free-Wing Unmanned Aerial Vehicle as a Microgravity Facility
G06-110 Unmanned Aerial Vehicle Dynamic-Target Pursuit by Using Probabilistic Threat Exposure Map
G06-077 Feasible Flight Paths for Cooperative Generation of a Phantom Radar Track
G06-034 Optimal Path Planning for Unmanned Combat Aerial Vehicles to Defeat Radar Tracking
G06-089 Algorithms for Geolocation of an Ad Hoc Network of Unmanned Systems
G06-153 Affine Parameter-Dependent Preview Control for Rotorcraft Terrain Following Flight

Experience the history of early rocketry and learn about subsequent developments that led us into the space age...

Blazing the Trail:

The Early History of Spacecraft and Rocketry

Mike Gruntman

This book presents the fascinating story of the events that paved the way to space. It introduces the reader to the history of early rocketry and the subsequent developments that led to the space age. People of various nations and from various lands contributed to the breakthrough to space, and the book takes the reader to faraway places on five continents. It also includes many quotes to give readers a flavor of how the participants viewed the developments.

Most publications on the topic either target narrow aspects of rocket history or are popular books that scratch the surface, with minimal and sometimes inaccurate technical details. This book bridges the gap. It contains numerous technical details usually unavailable in popular publications. The details are not overbearing, and anyone interested in rocketry and space exploration will navigate through the book without difficulty. There are 340 figures and photographs, many appearing for the first time.

2004, 475 pages, Hardback, ISBN: 156347705X
AIAA Member Price: $44.95 • List Price: $59.95

Here's what the reviewers are saying:
It is a fine historic account of the personalities, organizations, technical achievements in spacecraft and rocketry, and it is easy to read and well-written. —George P. Sutton

Chronological Index

G04-066E Erratum for "Flight Dynamics of the Boomerang, Part I" by Akira Azuma, Goru Beppu, Hiroaki Ihikawa, and Kunio Yasuda (**27**, 4, p. 545) Erratum

G06-001 Computer-Aided Eulerian Air Traffic Flow Modeling and Predictive Control. P K. Menon, G D. Sweriduk, T Lam, and G. M. Diaz, *Optimal Synthesis Inc*; and Karl D. Bilimoria, *NASA Ames Research Center* (**29**, 1, p. 12) Article based on AIAA Paper 2004-5317

G06-002 Feedback Control of Plants Driven by Nonlinear Actuators via Input-State Linearization. Tetsujiro Ninomiya and Isao Yamaguchi, *Japan Exploration Agency, Mitaka, Japan*; and Takashi Kida, *University of Electro-Communications, Japan* (**29**, 1, p. 20) Article

G06-003 Control and Maneuverability of a Square Cross-Section Missile. John R. Cleminson, *QinetiQ, Ltd., England, U. K.* ; and Rick A. Hyde, *University of Bristol, England, U. K.* (**29**, 1, p. 25) Article based on AIAA Paper 2004-5329

G06-004 Tractable Conflict Risk Accumulation in Quadratic Space for Autonomous Vehicles. Thomas Jones, *University of Stellenbosch, South Africa* (**29**, 1, p. 39) Article

G06-005 Spacecraft Navigation Using X-Ray Pulsars. Suneel I. Sheikh and Darryll J. Pines, *University of Maryland*; Paul S. Ray, Kent S. Wood, Michael N. Lovellette, and Michael T. Wolff, *U. S. Naval Research Laboratory* (**29**, 1, p. 49) Article

G06-006 Fast Star-Pattern Recognition Using Planar Triangles. Craig L. Cole, *Orbital Sciences Corporation*; and John L. Crassidis, *University at Buffalo* (**29**, 1, p. 64) Article

G06-007 Nonlinear Recursive Estimation of Boost Trajectories, Including Batch Initialization and Burnout Estimation. Michael E. Hough, *Raytheon Company* (**29**, 1, p. 72) Article

G06-008 Endgame Guidance and Relative Navigation of Strategic Interceptors with Delays. Hari B. Hablani, *The Boeing Company* (**29**, 1, p. 82) Article based on AIAA Paper 2000-4272

G06-009 Robust Navigation Using the Global Positioning System in the Presence of Spoofing. Yaakov Oshman and Mark Koifman, *Technion—Israel Institute of Technology, Israel* (**29**, 1, p. 95) Article based on AIAA Paper 2003-5668

G06-010 Optimal Fighter Pursuit-Evasion Maneuvers Found Via Two-Sided Optimization. Kazuhiro Horie and Bruce A. Conway, *University of Illinois* at Urbana-Champaign (**29**, 1, p. 105) Article

G06-011 Phase Space Structure Around Oblate Planetary Satellites. Juan F. San-Juan, *Universidad de La Rioja, Spain*; Martin Lara, *Real Observatorio de la Armada, Spain*; and Sebastian Ferrer, *Universidad de Murcia, Spain* (**29**, 1, p. 113) Article based on AIAA Paper 2004-4863

G06-012 Spacecraft Formation Dynamics and Design. V. M. Guibout and D. J. Scheeres, *University of Michigan* (**29**, 1, p. 121) Article based on AIAA Paper 2004-4736

G06-013 Decentralized Control of Satellite Clusters Under Limited Communication. Gene M. Belanger, Slava Ananyev, and Jason L. Speyer, *University of California, Los Angeles*; David F. Chichka, *George Washington University*; and J. Russell. Carpenter, *NASA Goddard Space Flight Center* (**29**, 1, p. 134) Article based on AIAA Paper 2004-5023

G06-014 Formation Design in Eccentric Orbits Using Linearized Equations of Relative Motion. Christopher Lane and Penina Axelrad, *Colorado Center for Astrodynamics Research, University of Colorado* (**29**, 1, p. 146) Article

G06-015 Optimal Planner for Spacecraft Formations in Elliptical Orbits. Darren J. Zanon and Mark E. Campbell, *Cornell University* (**29**, 1, p. 161) Article

G06-015TC Comment on "Optimal Planner for Spacecraft Formations in Elliptical Orbits," Prasenjit Sengupta, *Texas A&M University* (**29**,6, p. 1484)

G06-015R Reply by the Author to P. Sengupta, Darren. J. Zanon and Mark E. Campbell, *Cornell University*, (**29**,6, 1486)

G06-016 Trajectory Estimation for Satellite Clusters. Ralph E. Bordner and William E. Wiesel, *Air Force Institute of Technology* (**29**, 1, p. 172) Article

G06-017 Closed-Loop Aeromechanical Stability of Hingeless Rotor Helicopters with Higher Harmonic Control. Marco Lovera and Patrizio Colaneri, *Politecnico di Milano, Italy*; Carlos Malpica and Roberto Celi, *University of Maryland* (**29**, 1, p. 179) Article

G06-018 Energy Suboptimal Collision-Free Reconfiguration for Spacecraft Formation Flying. Cornel Sultan, *United Technologies Research Center*; Sanjeev Seereeram and Raman K. Mehra, *Scientific Systems Corporation, Inc.* (**29**, 1, p. 190) Engineering Note

G06-019 Dynamic Modeling and Neural-Network Adaptive Control of a Deployable Manipulator System. Y. Cao and C. W. de Silva, *University of British Columbia, Canada* (**29**, 1, p. 192) Engineering Note

G06-020 Computation of Worst-Case Pilot Inputs for Nonlinear Flight Control System Analysis. Prathyush P. Menon, Declan G. Bates, and Ian Postlethwaite, *University of Leicester, England, U. K.* (**29**, 1, p. 195) Engineering Note

G06-021 Aeroelastic Response of Flapped-Wing Systems Using Robust Estimation Control Methodology. Sungsoo Na, *Korea University, Republic of Korea*; Liviu Librescu, *Virginia Polytechnic Institute and State University*; Myung-Hyun Kim, *Pusan National University, Republic of Korea*; In-Joo Jeong, *Korea University, Republic of Korea*; and Piergiovanni Marzocca, *Clarkson University* (**29**, 1, p. 199) Engineering Note

G06-022 Optimal Servicing of Geosynchronous Satellites. Kyle T. Alfriend and Deok-Jin Lee, *Texas A&M University*; and N. G. Creamer, *U.S. Naval Research Laboratory* (**29**, 1, p. 203) Engineering Note based on AIAA Paper 2002-4905

G06-023 Adaptive Decoupled Fuzzy Sliding-Mode Control of a Nonlinear Aeroelastic System. Chih-Min Lin and Wei-Liang Chin, *Yuan-Ze University, Taiwan (ROC)* (**29**, 1, p. 206) Engineering Note

G06-024 Optimal Missions with Mini-Magnetospheric Plasma Propulsion. Giovanni Mengali and Alessandro A. Quarta, *University of Pisa, Italy* (**29**, 1, p. 209) Engineering Note

G06-025 Statistical Distribution of Keplerian Velocities. Dario Izzo, *ESA, The Netherlands* (**29**, 1, p. 212) Engineering Note

G06-026 General Formula for Extracting the Euler Angles. Malcolm D. Shuster, *Acme Spacecraft Company*; and F L. Markley, *NASA Goddard Space Flight Center* (**29**, 1, p. 215) Engineering Note

G06-027 Robust Reorientation and Power Controller Using Flywheels and Control Moment Gyroscopes. Christopher D. Karlgaard, *Analytical Mechanics Associates, Inc.* (**29**, 1, p. 217) Engineering Note

G06-028 Energy Rate Feedback for Libration Control of Electrodynamic Tethers. Paul Williams, *Royal Melbourne Institute of Technology University, Australia* (**29**, 1, p. 221) Engineering Note

G06-029 Intent Inference with Path Prediction. Jimmy Krozel, *Metron Aviation, Inc.*; and Dominick Andrisani II, *Purdue University* (**29**, 2, p. 225) Article

G06-030 A Unified Architecture for Strapdown Integration Algorithms. Paul G. Savage, *Strapdown Associates, Inc.* (**29**, 2, p. 237) Article

G06-030TC Comment on "A Unified Architecture for Strapdown Integration Algorithms," Y. Wu, National University of Defense Technology (PRC) (**29**,6, p. 1482)

G06-030R Reply by the Author to Y. Wu et al. Paul G. Savage, Strapdown Associates, Inc. (**29**,6, p.1485)

G06-031 Sliding-Mode Control for Integrated Missile Autopilot Guidance. Tal Shima, *RAFAEL Armament Development Authority, Ltd.*; Moshe Idan, *Technion—Israel Institute of Technology, Israel*; and Oded M. Golan, *RAFAEL Armament Development Authority, Ltd., Israel* (**29**, 2, p. 250) Article based on AIAA Paper 2004-4884

G06-032 Generalized Vector Explicit Guidance. Ernest J. Ohlmeyer and Craig A. Phillips, *Naval Surface Warfare Center* (**29**, 2, p. 261) Article

G06-033 Adaptive Terminal Guidance for Hypervelocity Impact in Specified Direction. Ping Lu, *Iowa State University*; David B. Doman, *U.S. Air Force Research Laboratory*; and John D. Schierman, *Barron Associates, Inc.* (**29**, 2, p. 269) Article

G06-034 Optimal Path Planning for Unmanned Combat Aerial Vehicles to Defeat Radar Tracking. Pierre T. Kabamba, Semyon M. Meerkov, and Frederick H. Zeitz, *University of Michigan* (**29**, 2, p. 279) Article

G06-035 Nonlinear Trajectory Generation for Autonomous Vehicles via Parametrized Maneuver Classes. Chris Dever, Bernard Mettler, Eric Feron, and Jovan Popovic, *Massachusetts Institute of Technology*; and Marc McConley, *Charles Stark Draper Laboratory, Inc.* (**29**, 2, p. 289) Article based on AIAA Paper 2004-5143

G06-036 Linear Programming and Language Processing for Human/Unmanned-Aerial-Vehicle Team Missions. T. Schouwenaars, M. Valenti, E. Feron, and J. How, *Massachusetts Institute of Technology*; and E. Roche, *Teragram Corporation* (**29**, 2, p. 303) Article based on AIAA Paper 2004-5142

G06-037 Circular-Navigation-Guidance Law for Precision Missile/Target Engagements. Ian R. Manchester and Andrey V. Savkin, *University of New South Wales, Australia* (**29**, 2, p. 314) Article

G06-038 Solving Optimal Continuous Thrust Rendezvous Problems with Generating Functions. Chandeok Park, Vincent Guibout, and Daniel J. Scheeres, *University of Michigan* (**29**, 2, p. 321) Article based on AIAA Paper 03-575

G06-039 Evolutionary Search for Deep-Space Science Mission Orbits. Pini Gurfil, *Technion-Israel Institute of Technology, Israel*; and Jeremy Kasdin, *Princeton University* (**29**, 2, p. 332) Article based on AIAA Paper 2002-4539

G06-040 Robust Capture and Transfer Trajectories for Planetary Satellite Orbiters. M. E. Paskowitz and D. J. Scheeres, *University of Michigan* (**29**, 2, p. 342) Article based on AIAA Paper 2004-4862

G06-041 Optimization of a Broad Class of Ephemeris Model Earth-Mars Cyclers. Ryan P. Russell, *Jet Propulsion Laboratory, California Institute of Technology*; and Cesar A. Ocampo, *University of Texas at Austin* (**29**, 2, p. 354) Article

G06-042 Application of the Cayley Form to General Spacecraft Motion. Andrew J. Sinclair, John E. Hurtado, and John L. Junkins, *Texas A&M University* (**29**, 2, p. 368) Article

G06-043 Nonlinear Aeroelastic System Identification with Application to Experimental Data. Sunil L. Kukreja and Martin J. Brenner, *NASA Dryden Flight Research Center* (**29**, 2, p. 374) Article

G06-044 Nonlinear Adaptive Control of an Aeroelastic Two-Dimensional Lifting Surface. A. Behal, P. Marzocca, V. M. Rao, and A. Gnann, *Clarkson University* (**29**, 2, p. 382) Article

G06-045 Tensor-Product Model-Based Control of Two-Dimensional Aeroelastic System. Peter Baranyi, *Computer and Automation Research Institute of the Hungarian Academy of Sciences, Hungary* (**29**, 2, p. 391) Article

G06-046 Optimal Control of an Aircraft-Towed Flexible Cable System. Paul Williams, Daniel Sgarioto, and Pavel Trivailo, *Royal Melbourne Institute of Technology University, Australia* (**29**, 2, p. 401) Article

G06-047 Adaptive Model Inversion Control of a Helicopter with Structural Load Limiting. Nilesh A. Sahani and Joseph F. Horn, *Pennsylvania State University* (**29**, 2, p. 411) Article

G06-048 System Identification of a Nonlinear Mode for the Shuttle Radar Topography Mission. Paul B. Brugarolas, David S. Bayard, John T. Spanos, and William G. Breckenridge, *Jet Propulsion Laboratory, California Institute of Technology* (**29**, 2, p. 421) Article based on AIAA Paper 2002-4937

G06-049 Combined Feedback Linearization and Constrained Model Predictive Control for Entry Flight. W. R. van Soest, Q. P. Chu, and J. A. Mulder, *Delft University of Technology, The Netherlands* (**29**, 2, p. 427) Article

G06-050 Full-Envelope Robust Control of a Shrouded-Fan Unmanned Vehicle. Giulio Avanzini, *Politecnico di Torino, Italy*; Umberto Ciniglio, *Italian Aerospace Research Centre, Italy*; and Guido de Matteis, *University of Rome "La Sapienza", Italy* (**29**, 2, p. 435) Article based on AIAA Paper 2003-5521

G06-051 Design of a Gain-Scheduled Flight Control System Using Bifurcation Analysis. Thomas Richardson, Mark Lowenberg, Mario diBernardo, and Guy Charles, *University of Bristol, England, U.K.* (**29**, 2, p. 444) Article

G06-052 Direct Adaptive Neural Flight Controller for F-8 Fighter Aircraft. S Suresh, S N Omkar, and V. Mani, *Indian Institute of Science, India*; and N Sundararajan, *Nanyang Technological University, Singapore* (**29**, 2, p. 454) Article

G06-053 Novel Adaptive Generalized Likelihood Ratio Detector with Application to Maneuvering Target Tracking. Dany Dionne and Hannah Michalska, *McGill University, Canada*; Yaakov Oshman and Josef Shinar, *Technion-Israel Institute of Technology, Israel* (**29**, 2, p. 465) Article

G06-054 Design of Autoland Controller Functions with Multi-objective Optimization. Gertjan Looye and Hans-Dieter Joos, *German Aerospace Center, DLR-Oberpfaffenhofen, Germany* (**29**, 2, p. 475) Article based on AIAA Paper 2002-4666

G06-055 Design and Flight Testing of an H00 Controller for a Robotic Helicopter. M. La Civita, *Carnegie Mellon University*; G. Papageorgiou, *University of Minnesota*; W. C. Messner and T. Kanade, *Carnegie Mellon University* (**29**, 2, p. 485) Article

G06-082 Precision Free-Inertial Navigation with Gravity Compensation by an Onboard Gradiometer. Christopher Jekeli, *The Ohio State University* (**29**, 3, p. 704) Article

G06-083 Adaptive Formation Control for Rovers Traveling over Unknown Terrains. Farid Ganji and Sanjay S. Joshi, *University of California, Davis*; and David S. Bayard, *Jet Propulsion Laboratory* (**29**, 3, p. 714) Article

G06-084 Adaptive Guidance and Control for Autonomous Hypersonic Vehicles. Eric N. Johnson, Anthony J. Calise, and Michael D. Curry, *Georgia Institute of Technology*; Kenneth D. Mease, *University of California, Irvine*; and J. Eric Corban, *Guided Systems Technologies, Inc.* (**29**, 3, p. 725) Article

G06-085 Stochastic Stability Analysis of Predictive Filters. Ji Li and Hong-Yue Zhang, *Beijing University of Aeronautics and Astronautics, China (PRCc)* (**29**, 3, p. 738) Engineering Note

G06-086 Earth-Pointing Recovery. M. P. Ramachandran, *ISRO Satellite Centre, India* (**29**, 3, p. 742) Engineering Note

G06-087 Adaptive Control for a Nonlinear Wing Section with Multiple Flaps. A. Behal, V.M. Rao, and P. Marzocca, *Clarkson University* (**29**, 3, p. 744) Engineering Note

G06-088 Optimal Design of Octo-Strut Vibration Isolation Platform. Z. Wang, L. K. Liu, and G. T. Zheng, *Harbin Institute of Technology, China (PRC)* (**29**, 3, p. 749) Engineering Note

G06-089 Algorithms for Geolocation of an Ad Hoc Network of Unmanned Systems. Danny Carter and Aaron S. Brown, *U. S. Army Research, Development, and Engineering* (**29**, 3, p. 753) Engineering Note based on AIAA Paper 2004-6481

G06-090 Integral Evaluations Enabling Performance Tradeoffs for Two-Confidence-Region-Based Failure Detection. Thomas H. Kerr, *TeK Associates* (**29**, 3, p. 757) Engineering Note

G06-091 Output Feedback Control of Two-Dimensional Aeroelastic System. Peter Baranyi, *Hungarian Academy of Sciences, Hungary* (**29**, 3, p. 762) Engineering Note

G06-092 Modeling, Control, and Flight Testing of a Small Ducted-Fan Aircraft. Eric N. Johnson and Michael A. Turbe, *Georgia Institute of Technology* (**29**, 4, p. 769) Article based on AIAA Paper 2005-6281

G06-093 Path-Oriented Control/Display Augmentation for Perspective Flight-Path Displays. C. Borst, M. Mulder, M. M. van Paassen, and J. A. Mulder, *Delft University of Technology, The Netherlands* (**29**, 4, p. 780) Article based on AIAA Paper 2004-5236

G06-094 Investigation of Periodic-Disturbance Identification and Rejection in Spacecraft. Jimmy Lau and Sanjay S. Joshi, *University of California, Davis*; Brij N. Agrawal and Jong-Woo Kim, *Naval Postgraduate School* (**29**, 4, p. 792) Article

G06-095 Spin Axis Attitude Determination Accuracy Model in Presence of Biases. Jozef C. van der Ha, *Mission Design and Operations* (**29**, 4, p. 799) Article

G06-096 In-Plane Payload Capture with an Elastic Tether. Paul Williams, *Royal Melbourne Institute of Technology, Australia* (**29**, 4, p. 810) Article

G06-097 Switching Control for Guaranteeing the Safety of a Tethered Satellite. Masamitsu Okazaki, *Fujitsu Ten, Japan*; and Toshiyuki Ohtsuka, *Osaka University, Japan* (**29**, 4, p. 822) Article

G06-098 Linear Dynamics and Stability Analysis of a Two-Craft Coulomb Tether Formation. Arun Natarajan and Hanspeter Schaub, *Virginia Polytechnic and State University* (**29**, 4, p. 831) Article

G06-099 Dynamic Testing of an Inflatable, Self-Supporting, Unpressurized Thin-Film Torus. Haiping Song, Suzanne W. Smith, and John A. Main, *University of Kentucky* (**29**, 4, p. 839) Article

G06-100 Trajectory Tracking Controller for Vision-Based Probe and Drogue Autonomous Aerial Refueling. Monish D. Tandale, Roshawn Bowers, and John Valasek, *Texas A&M University* (**29**, 4, p. 846) Article based on AIAA Paper 2005-5868

G06-101 Visual Positioning System for an Underwater Space Simulation Environment. Jeffrey R. Smithanik, Ella M. Atkins, and Robert M. Sanner, *University of Maryland* (**29**, 4, p. 858) Article

G06-102 Flight Control Law Design for a Flexible Aircraft: Limits of Performance. Gilles Ferreres, *ONERA, France*; and Guilhem Puyou, *AIRBUS France, France* (**29**, 4, p. 870) Article

G06-103 Attitude Estimation from Vector Observations Using Genetic-Algorithm-Embedded Quaternion Particle Filter. Yaakov Oshman and Avishy Carmi, *Technion— Israel Institute of Technology, Israel* (**29**, 4, p. 879) Article based on AIAA Paper 2004-5340

G06-104 Adaptive Output Feedback Control for Spacecraft Rendezvous and Docking Under Measurement Uncertainty. Puneet Singla, *Texas A&M University*; Kamesh Subbarao, *University of Texas*; and John L. Junkins, *Texas A&M University* (**29**, 4, p. 892) Article based on AIAA Paper 03-103

G06-105 Airship Hover Stabilization Using a Backstepping Control Approach. José Raul Azinheira and Alexandra Moutinho, *Instituto Superior Tecnico, Portugal*; and Ely Carneiro de Paiva, *Centro de Pesquisas Renato Archer, Brazil* (**29**, 4, p. 903) Article

G06-106 Necessary and Sufficient Conditions for H-Infinity Static Output-Feedback Control. Jyotirmay Gadewadikar, Frank L. Lewis, and Murad Abu-Khalaf, *University of Texas at Arlington* (**29**, 4, p. 915) Article

G06-107 Optimal Finite-Time Feedback Controllers for Nonlinear Systems with Terminal Constraints. Srinivas R. Vadali and Rajnish Sharma, *Texas A&M University* (**29**, 4, p. 921) Article

G06-108 Real-Time Dynamic Optimization of Controllable Linear Systems. Martin Guay, *Queen's University, Canada*; and J. Fraser Forbes, *University of Alberta, Canada* (**29**, 4, p. 929) Article

G06-109 Aeroelastic System Identification Using the Minimum Model Error Method. Oleg V. Shiryayev and Joseph C. Slater, *Wright State University* (**29**, 4, p. 936) Article

G06-110 Unmanned Aerial Vehicle Dynamic-Target Pursuit by Using Probabilistic Threat Exposure Map. Atilla Dogan and Ugur Zengin, *University of Texas at Arlington* (**29**, 4, p. 944) Article based on AIAA Paper 2004-6580

G06-111 Computationally Inexpensive Guidance Algorithm for Fuel-Efficient Terminal Descent. Federico Najson and Kenneth D. Mease, *University of California at Irvine* (**29**, 4, p. 955) Article

G06-112 Stability Analysis of a Dynamically Tuned Gyroscope. Jeffrey S. Cain and Douglas A. Staley, *Carleton University, Canada*; Glenn R. Heppler and John McPhee, *University of Waterloo, Canada* (**29**, 4, p. 965) Article

G06-113 Decision-Directed Adaptive Estimation and Guidance for an Interception Endgame. Dany Dionne and Hannah Michalska, *McGill University, Canada*; Josef Shinar and Yaakov Oshman, *Technion - Israel Institute of Technology, Israel* (**29**, 4, p. 970) Article

G06-114 New Global Navigation Satellite System Ambiguity Resolution Method Compared to Existing Approaches. Sandra Verhagen and Peter J. Teunissen, *Delft University of Technology, The Netherlands* (**29**, 4, p. 981) Article

G06-115 Aggregate Flow Model for Air-Traffic Management. Banavar Sridhar, *NASA Ames Research Center*; Tarun Soni, *General Dynamics*; Kapil Sheth and Gano Chatterji, *University of California Santa Cruz* (**29**, 4, p. 992) Article

G06-116 Trajectories to and from the Lagrange Points and the Primary Body Surfaces. Hexi Baoyin and Colin R. McInnes, *University of Strathclyde, Scotland, U.K.* (**29**, 4, p. 998) Article

G06-117 Manifolds and Metrics in the Relative Spacecraft Motion Problem. Pini Gurfil, *Technion— Israel Institute of Technology, Israel*; and Konstantin V. Kholshevnikov, *St. Petersburg State University, Russia* (**29**, 4, p. 1004) Article

G06-118 Indirect Optimization of Low-Thrust Capture Trajectories. Marco La Mantia and Lorenzo Casalino, *Politecnico di Torino, Italy* (**29**, 4, p. 1011) Engineering Note based on AIAA Paper 2005-4266

G06-119 Multistepping Approach to Finite-Interval Missile Integrated Control. S. S. Vaddi, P. K. Menon, and G. D. Sweriduk, *Optimal Synthesis, Inc.*; and E. J. Ohlmeyer, *Naval Surface Warfare Center* (**29**, 4, p. 1015) Engineering Note based on AIAA Paper 2005-5966

G06-120 Improvement to the Analytical Predictor-Corrector Guidance Algorithm Applied to Mars Aerocapture. Jean-Francois Hamel and Jean de Lafontaine, *Université de Sherbrooke, Canada* (**29**, 4, p. 1019) Engineering Note based on AIAA Paper 2005-5997

G06-121 Spacecraft Attitude Control Using Approximate Receding-Horizon Model-Error Control Synthesis. Jongrae Kim, *University of Leicester, England, U.K.*; and John L. Crassidis, *University at Buffalo* (**29**, 5, p. 1023) Article

G06-122 Optimization and Implementation of Periodic Cruise for a Hypersonic Vehicle. Robert H. Chen, Walton R. Williamson, and Jason L. Speyer, *SySense Inc.*; Hussein Youssef and Rajiv Chowdhry, *Lockheed Martin Aeronautics Company* (**29**, 5, p. 1032) Article

G06-123 International Space Station Leak Localization Using Attitude Response Data. Jong-Woo Kim, *Texas A&M University*; John L. Crassidis, *University at Buffalo*; Srinivas R. Vadali, *Texas A&M University*; and Adam L. Dershowitz, *Exponent, Failure Analysis Associates* (**29**, 5, p. 1041) Article

G06-124 Fault-Detection Design for Uninhabited Aerial Vehicles. Hector Rotstein, Ryan Ingvalson, Tamas Keviczky, and Gary J. Balas, *University of Minnesota* (**29**, 5, p. 1051) Article based on AIAA Paper 2005-6251

G06-125 Game Optimal Support Time of a Medium Range Air-to-Air Missile. Janne Karelahti, Kai Virtanen, and Tuomas Raivio, *Helsinki University of Technology, Finland* (**29**, 5, p. 1061) Article

G06-126 Batch Algorithm for Global-Positioning-System Attitude Determination and Integer Ambiguity Resolution. Mark L. Psiaki, *Cornell University* (**29**, 5, p. 1070) Article

G06-127 Modeling Air Combat by a Moving Horizon Influence Diagram Game. Kai Virtanen, Janne Karelahti, and Tuomas Raivio, *Helsinki University of Technology, Finland* (**29**, 5, p. 1080) Article

G06-128 Unmanned Aerial Vehicle Path Following for Target Observation in Wind. Rolf Rysdyk, *University of Washington* (**29**, 5, p. 1092) Article

G06-129 Decentralized Coordinated Attitude Control Within a Formation of Spacecraft. Matthew C. VanDyke and Christopher D. Hall, *Virginia Polytechnic Institute and State University* (**29**, 5, p. 1101) Article

G06-130 Periodic Relative Motion Near a Keplerian Elliptic Orbit with Nonlinear Differential Gravity. Prasenjit Sengupta, Rajnish Sharma, and Srinivas R. Vadali, *Texas A&M University* (**29**, 5, p. 1110) Article

G06-131 Spacecraft Formation Flight About Libration Points Using Impulsive Maneuvering. Henry J. Pernicka, Brian A. Carlson, and S.N. Balakrishnan, *University of Missouri-Rolla* (**29**, 5, p. 1122) Article

G06-132 Periodic Orbits with Low-Thrust Propulsion in the Restricted Three-Body Problem. Mutsuko Morimoto, *Graduate University for Advanced Studies, Japan*; Hiroshi Yamakawa and Kuninori Uesugi, *Japan Aerospace Exploration Agency, Japan* (**29**, 5, p. 1131) Article

G06-133 Collision Avoidance for Satellites in Formation Flight. G. L. Slater, S. M. Byram, and T. W. Williams, *University of Cincinnati* (**29**, 5, p. 1140) Article based on AIAA Paper 2004-5216

G06-134 Design of Science Orbits About Planetary Satellites: Application to Europa. Marci E. Paskowitz and Daniel J. Scheeres, *University of Michigan* (**29**, 5, p. 1147) Article

G06-135 Absolute and Relative Orbit Analysis for Resonant Satellite Motion. Kathryn O'Donnell and Philip L. Palmer, *University of Surrey, England, U.K.*. (**29**, 5, p. 1159) Article

G06-136 Parametric Model and Optimal Control of Solar Sails with Optical Degradation. Bernd Dachwald, *DLR, German Aerospace Center, Germany*; Giovanni Mengali and Alessandro A. Quarta, *University of Pisa, Italy*; and Malcolm Macdonald, *University of Glasgow, Scotland, U.K.* (**29**, 5, p. 1170) Article

G06-137 Nonlinear Model Predictive Control Technique for Unmanned Air Vehicles. Nathan Slegers, *University of Alabama at Huntsville*; Jason Kyle, *Oregon State University*; and Mark Costello, *Georgia Institute of Technology* (**29**, 5, p. 1179) Article

G06-138 Investigation of the Flare Maneuver Using Optical Tau. Michael Jump and Gareth D. Padfield, *University of Liverpool, Great Britain* (**29**, 5, p. 1189) Article based on AIAA Paper 2005-6404

G06-139 Effect of Piezoelectric Hysteresis on Helicopter Vibration Control Using Trailing-Edge Flaps. S.R. Satyamangalam and Ranjan Ganguli, *Indian Institute of Science, India* (**29**, 5, p. 1201) Article based on AIAA Paper 2005-2247

G06-140 Certification and Design Issues for Rudder Control Systems in Transport Aircraft. Ronald A. Hess, *University of California* (**29**, 5, p. 1210) Article based on AIAA Paper 2005-6035

G06-141 Peak-Seeking Control for Drag Reduction in Formation Flight. David F. Chichka, *George Washington University*; Jason L. Speyer, *Universityof California, Los Angeles*; Claudio Fanti, *Universita di Padova, Italy*; and Chan G. Park, *Kwangwoon University, Republic of Korea* (**29**, 5, p. 1221) Article

G06-142 Orbit Design for Ground Surveillance Using Genetic Algorithms. Ossama Omarabdelkhalik and Daniele Mortari, *Texas A&M University* (**29**, 5, p. 1231) Engineering Note

G06-143 Laser Pointing and Tracking Using a Completely Electromagnetically Suspended Precision Actuator. Zhaohui Ren, *Mohawk Innovative Technology, Inc.*; and Lyndon S. Stephens, *University of Kentucky* (**29**, 5, p. 1235) Engineering Note

G06-144 Minimagnetospheric Plasma Propulsion for Outer Planet Missions. Giovanni Mengali and Alessandro A. Quarta, *University of Pisa, Italy* (**29**, 5, p. 1239) Engineering Note

G06-145 Lambert's Problem for Exponential Sinusoids. Dario Izzo, *ESA, The Netherlands* (**29**, 5, p. 1242) Engineering Note

G06-146 Genesis of Three-Axis Spacecraft Guidance, Control, and On-Orbit Stabilization. John C. Herther, *MITRE Corporation*; and James S. Coolbaugh, *Iotron Corp.* (**29**, 6, p. 1247) History of Key Technologies

G06-147 Tailored Dynamic Gain-Scheduled Control. Chris D. Jones, Mark H. Lowenberg, and Thomas S. Richardson, *University of Bristol, England, U.K.* (**29**, 6, p. 1271) Article

G06-148 Quasilinear Parameter-Varying Autopilot Design Using Polynomial Eigenstructure Assignment with Actuator Constraints. Lilian Bruyere, Antonios Tsourdos, and Brian White, *Cranfield University, England, U.K.* (**29**, 6, p. 1282) Article based on AIAA Paper 2005-6383

G06-149 Spacecraft Line-of-Sight Control Using a Single Variable-Speed Control Moment Gyro. Hyungjoo Yoon, *Samsung Electronics, South Korea*; and Panagiotis Tsiotras, *Georgia Institute of Technology* (**29**, 6, p. 1295) Article based on AIAA Paper 2005-6393

G06-150 Linear Feedback Control Using Quasi Velocities. Andrew J. Sinclair, *Auburn University*; John E. Hurtado and John L. Junkins, *Texas A&M University* (**29**, 6, p. 1309) Article

G06-151 Sliding Mode Disturbance Observer-Based Control for a Reusable Launch Vehicle. Charles E. Hall, *NASA Marshall Space Flight Center;* and Yuri B. Shtessel, *University of Alabama in Huntsville* (**29**,6, p. 1315) Article based on AIAA Paper 2005-6145

G06-152 Attitude Determination Using a Single Star Sensor and a Star Density Table. Jinchun Wang and Joohwan Chun, *Korea Advanced Institute of Science and Technology, Republic of Korea*, (**29**,6, p. 1329) Article

G06-153 Simplified Technique for Modeling Piloted Rotorcraft Operations Near Ships. Ronald A. Hess, *University of California* (**29**,6, p. 1339) Article based on AIAA Paper 2005-6030

G06-154 Affine Parameter-Dependent Preview Control for Rotorcraft Terrain Following Flight. Nuno Paulino, Carlos Silvestre, and Rita Cunha, *Instituto Superior Tecnico, Portugal* (**29**,6, p. 1350) Article based on AIAA Paper 2005-6370

G06-155 Indirect Optimization of Spiral Trajectories. Chris L. Ranieri and Cesar A. Ocampo, *The University of Texas at Austin* (**29**, 6, p. 1360) Article

G06-156 Nonlinear Mapping of Gaussian Statistics: Theory and Applications to Spacecraft Trajectory Design. Ryan S. Park and Daniel J. Scheeres, *University of Michigan* (**29**,6, p. 1367) Article

G06-157 On the Lyapunov Stability of Stationary Points Around a Central Body. Antonio Elipe, *University of Zaragoza, Spain;* and Teodoro Lopez-Moratalla, *Real Observatorio de la Armada, Spain* (**29**,6, p. 1376) Article based on AIAA Paper 2004-5303

G06-158 Models for Rhumb-Line Attitude Maneuvers and Error Propagation Effects. Jozef C. van der Ha, *Consultant* (**29**,6, p. 1384) Article

G06-159 Optimal Balanced-Energy Formation Flying Maneuvers. Amirreza Rahmani and Mehran Mesbahi, *University of Washington;* and Fred Y. Hadaegh, *Jet Propulsion Laboratory, California Institute of Technology* (**29**,6, p. 1395) Article

G06-160 Performance Optimization for a Towed Cable System with Attached Wind Sock. Paul Williams and Pavel Trivailo, *RMIT University, Australia* (**29**,6, p. 1415) Technical Note

G06-161 Simple Practical Classical-H2 Optimal Robust Controller. Verica Radisavljevic, *Lafayette College* (**29**,6, p. 1417) Technical Note

G06-162 Solving Linear and Quadratic Quaternion Equations. James D. Turner, *TAMU Aerospace* (**29**,6, p. 1420) Technical Note

G06-163 Aeroservoelastic Stability of Supersonic Slender Body Flight Vehicles. Hassan Haddadpour, *Sharif University of Tecnology, Iran* (**29**,6, p. 1423) Technical Note

G06-164 Estimation of the Region of Attraction for State-Dependent Riccati Equation Controllers. Andrea Bracci, Lorenzo Pollini, and Mario Innocenti, *University of Pisa, Italy* (**29**,6, p. 1427) Technical Note

G06-165 Equilibrium Configurations of a Four-Body Tethered System. Annelisie A. Corrsa, *DMCIINPE, Brazil;* and Gerard Gbmez, *MAiAIUB, Spain* (**29**,6, p. 1430) Technical Note

G06-166 Direct Trajectory Optimization and Costate Estimation via a Gauss Pseudospectral Method. David A. Benson and Geoffrey T. Huntington, Tom P. Thorvaldsen, and And V. Rao, *Charles Stark Draper Laborator, Inc.* (**29**,6, p. 1435) Technical Note

G06-167 Ant Colony Algorithms for Two Impluse Interplanetary Trajectory Optimization. Gianmarco Radice and German Olmo, *University of Glasgow, Scotland, U.K.* (**29**,6, p. 1440) Technical Note

G06-168 Deadbeat Predictive Control on a Space Truss Structure. Lorenzo Dozio, *Politecnico di Milano, Italy* (**29**,6, p. 1444) Technical Note

G06-169 Parametric Optimization Analysis for Minimum-Fuel Low-Thrust Coplanar Orbit Transfer. Yumin Chen and Donglong Sheu, *National Cheng Kung University, Taiwan (ROC)* (**29**,6, p. 1446) Technical Note

G06-170 Equilibrium Control of Electrodynamic Tethered Satellite Systems in Inclined Orbits. Xiang Zhou, Junfeng Li, H. Baoyin, and Vadim Zakirov, *Tsinghua University, China (PRC)* (**29**,6, p. 1451) Technical Note

G06-171 Probabilistic Robust Linear Parameter-Varying Control of an F-16 Aircraft. Bei LU, *California State University;* and Fen Wu, *North CarolinaState University* (**29**,6, p. 1454) Technical Note based on AIAA Paper 2005-6080

G06-172 Guidance Law for an Air-Breathing Launch Vehicle Using Predictive Control Concept. V. Brinda, *Vikram Sarabhai Space Centre, India;* and S. Dasgupta, *Noorul Islam College of Engineering, India* (**29**,6, p. 1460) Technical Note

G06-173 Optimal Control Laws for Momentum-Wheel Desaturation Using Magnetorquers. Fabrizio Giulietti, *University of Bologna, Italy;* Alessandro A. Quarta, *University of Pisa, Italy;* and Paolo Tortora, *University of Bologna, Italy* (**29**,6, p. 1464) Technical Note

G06-174 Collision Probability for Larger Bodies Having Nonlinear Relative Motion. Russell P. Patera, *The Aerospace Corporation* (**29**,6, p. 1468) Technical Note

G06-175 Asymptotic Stability of Second-Order Linear Time-Varying Systems. Ryotaro Okano, Takashi Kida, and Tomoyuki Nagashio, *University of Electro Communications, Japan* (**29**,6, p. 1472) Technical Note

G06-176 Flight Test of Model-Matching Controller for In-Flight Simulator MuPAL-alpha. Masayuki Sato, *Japan Aerospace Exploration Agency, Japan* (**29**,6, p. 1476) Technical Note based on AIAA Paper 2004-379
